

Dear all,

I really do use VRS (VideoRelayService) for all of my phone calls. I do not see how I can go back to using TTY relay because TTY relay cuts out alot of unseen communicating factors pertinent to the whole communcation. I have been using VRS for my business and I was able to conduct my business more effectively. For example, there is no time lag during the phone call which hearing people have told me that they really do appreciate very much. Please do not cut out VRS. If you have problems, please do not hesitate to contact us.
